

Two factor authentication

1. First you have to click on your username in the top right corner and select the "Change password" function.

2. Here you have the option to choose between 3 possibilities to activate the two-factor authentication.

3. If you want to choose option 3 "Text Message", you have to deposit your phone number:

1. Select Profile

Services → **Profile** Security

Two-factor authentication

Status: **Off**

After entering your password, you will be asked for a second verification step.

- Security Key**
A security key is a small physical device used for signing in. It plugs into your computer's USB port. Security keys use the **FIDO U2F** s
ADD KEY
- Authenticator application**
Verification codes are generated on your phone. Install the application from **Google Play** or **App Store**.
ADD AUTHENTICATOR APPLICATION
- Text Message**
Verification codes are sent by text message.
❗ Please add a mobile number to your **account**.

2. Add your phone number to your profile

Update Profile

Login	lena@nimbusec.com	?
*Email	lena@nimbusec.com

UPDATE PROFILE

4. Now you can choose the button "Security" and choose option 3 "Text Message".

The screenshot shows the 'Update Profile' section of a user interface. At the top, there is a dark navigation bar with three icons: a grid for 'Services', a person icon for 'Profile' (which is highlighted in orange), and a lock icon for 'Security'. Below the navigation bar, the 'Update Profile' form is displayed. It contains two rows of input fields. The first row is labeled 'Login' and contains the email 'lena@nimbusec.com' with a question mark icon to its right. The second row is labeled '*Email' and also contains 'lena@nimbusec.com'.

5. After you selected the option “Text message” there is going to appear the following pop up. You are receiving a text message with a verification code.

The screenshot shows a 'Add phone' confirmation pop-up. The title is 'Add phone' with a close button (X) in the top right corner. The main text says 'Confirm that it works..' followed by 'Nimbusec just sent a text message with a verification code to +43'. Below this, there is a label 'Code' and a text input field with the placeholder '6-digit authentication code'. At the bottom right, there are two buttons: a grey 'CANCEL' button and an orange 'CONTINUE' button.

6. Now you can see, that the status of the two- factor authentication is green and “On”.

The screenshot shows the 'Two-factor authentication' settings page. At the top, there is a 'TURN OFF' button and a status indicator. The status is 'On' (highlighted with a red circle) with the text '(since 2023-04-06 15:09)'. Below this, a message states: 'After entering your password, you will be asked for a second verification step.' There are three options listed: 1. 'Security Key' with a description and an 'ADD KEY' button. 2. 'Authenticator application' with a description and an 'ADD AUTHENTICATOR APPLICATION' button. 3. 'Text Message' (highlighted with a green checkmark) with the phone number '+43' and a description 'Verification codes are sent by text message.'

7. The other two options are self-explanatory.
