# What is Nimbusec?

Nimbusec is a website security monitoring tool that notifies you, when your website was hacked or is in danger.

It allows you to react before your customers or your reputation are harmed.

- **Safe:** Nimbusec never exposes data of your servers to the cloud, respecting European Data Security Laws
- **Fast:** Depending on your plan you know what happened in minutes

Nimbusec also features:

- Notifications per mail and text messaging
- API for deep integration (SIEM, Ticketing Systems, Automated reactions)
- Plesk Panel Integration: Nimbusec Webhosting Security on Plesk Marketplace
